Safety Plans

Each school in the Paulding County School District has an extensive and comprehensive Safety Plan that is specific to that school. The safety plans of each school are GEMA approved and in compliance with the guidelines of the Georgia Department of Education. Each school also has a Safety Coordinator for that school and part of their job is to disseminate information to all staff. Safety moments should be a part of every faculty meeting that is held to ensure that school safety is constantly being discussed and is an important part of a school culture. Each staff members should be aware of the responsibility that each one has in the event of a drill or actual situation that might take place. The safety of our students and staff is paramount to the Paulding County School District. Please do your part to ensure that our schools safety plans are followed with fidelity and if there are concerns please express those to your school safety coordinators.

Fire Safety

LOOK AROUND...

Do you know where the nearest fire extinguisher is located?

Do you know how to use it?

Remember: follow these steps

P---Pull Pin

A—Aim at base of fire

S—Squeeze handle

S—Sweep side to side

Sever Weather Awareness Week

Governor Nathan Deal has declared February 4-8 as Severe Weather Awareness Week. All our schools will participate in the statewide tornado drill on Wednesday, February 6, 2013 at 9:00 am. Before the drill each safety coordinator should review with staff drill procedures and expectations. If you have questions regarding this drill please contact your school safety coordinator.
