

January 18, 2019

Dear Parents:

On behalf of Ragsdale Elementary School in the Paulding County School System, I would like to introduce myself and welcome you and your family to take part in the many parent involvement resources we offer at Ragsdale. We understand preparing your child to enter Kindergarten is an exciting and sometimes scary time, but our goal at Ragsdale is to help bridge the transition between Pre-K into Kindergarten.

Our goal at each elementary school is to build a strong relationship with all families and community to achieve student success. We welcome you to take part in the following parent involvement opportunities, and invite you to access the following resources:

- **Parent Resource Center** (PRC) provides a variety of educational and entertaining games, books and other materials for use at home. Each school's PRC is open during the day and resources are available for check out.
- **Family Nights and Parent Meetings** are hosted throughout the year as a time for families to engage in educational activities in reading, math, science, and/or social studies. Families are provided with information about numerous topics such as how to monitor your child's progress, literacy/math training, and technology training.
- **School Websites** also offer important information about each school such as upcoming events, parent involvement resources, newsletters, and school contact information. These can be found by visiting the **www.paulding.k12.ga.us** and click on Select a School at the top of the page.
- **Kindergarten Registration** takes place during the spring of each year. Information will soon be placed on our Paulding County Schools webpage.
- **School Visits** can be arranged anytime throughout the school year by contacting the school.

I want you to know that I would love to include you in parent meetings, and share resources with you.

Sincerely,

Sandra Mitchell
