BRING YOUR OWN TECHNOLOGY (BYOT) PROGRAM

The Paulding County Board of Education is committed to helping students maximize learning by fully integrating relevant technology into instruction and academic content; therefore, students may bring their own technology tools to their school campus.

Definition of "Technology"

For purposes of Bring Your Own Technology (BYOT), "Technology" means personally owned wireless and/or portable electronic equipment or device that includes, but is not limited to, existing and emerging mobile communication systems and smart technologies, portable Internet devices, hand held entertainment systems or portable information technology systems that can be used for word processing, wireless Internet access, image capture/recording, sound recording and information transmitting/ receiving/ storing, etc.

Internet

Students will be expected to access the internet through the Paulding County School District (PCSD) "Guest" Network. Personal Internet connective devices are not permitted to be used to access outside Internet sources at any time using those plans.

PCSD is providing wireless connectivity as a guest service and offers no guarantees that any use of the wireless connection is in any way secure, or that any privacy can be protected when using this wireless connection. Use of the PCSD wireless network is entirely at the risk of the user, and PCSD is not responsible for any loss of any information that may arise from the use of the wireless connection, or for any loss, injury or damages resulting from the use of the wireless connection.

The PCSD Guest Network is filtered in accordance with the Children's Internet Protection Act (CIPA). All teacher users will be filtered at the student level when using personal technology devices.

Security and Damages

Responsibility to keep the device secure rests with the individual owner. The Paulding County School District, its staff, or employees, are not liable for any device lost, stolen or damaged on campus. If a device is lost, stolen or damaged, it will be handled through the administrative office similar to other personal artifacts that are impacted in similar situations.

Student Agreement

The use of personal technology to access educational material is not a necessity or a right but a privilege. When abused, privileges may be taken away. When respected, they will benefit the learning environment as a whole.

Students and parents/guardians participating in BYOT must adhere to the Student Code of Conduct, as well as all Board policies, particularly Internet Acceptable Use (Policy IFBG) and Electronic Communications (Policy IFBGA). Additionally:

- The technology is allowed for educational purposes and only to enhance the classroom experience. Teachers will decide when it may be used and for what purpose(s). The technology may only be used to access files on computer or Internet sites which are relevant to the classroom curriculum.
- Students take full responsibility for their personal electronic/digital devices. The school/district is not responsible for the security of the electronic devices. Additionally, students are responsible for management, trouble shooting, and technical support of their personal devices. The school/district is not responsible for technical support of or repairs to personal devices.
- The technology may not be used to cheat on assignments or tests.
- The technology may not be used for non-instructional purposes (such as making personal phone calls and text/instant messaging) unless authorized by the teacher or administration.

Accredited by the Southern Association of Colleges and Schools Rev. 2/13

- The technology may not be used to record, transmit or post photographic images or video of a person, or persons on campus during school activities and/or hours unless authorized by the teacher or administration.

Students acknowledge that:

- Each teacher will decide if, when and how BYOT will be used in his/her classroom.
- The school's network filters will be applied to one's connection to the Internet, and there will be no attempts to by-pass those filters.
- Bringing on premises, attempting to infect, or infecting the network with a Virus, Trojan, malware, or program(s) designed to damage, alter, destroy, or provide access to unauthorized data or information is in violation of Policy IFBG and the student acceptable use policy outlined in the Code of Conduct.
- Processing or accessing information on school property related to "hacking", altering, or bypassing network security policies is in violation of Policy IFBG, and the student acceptable use policy outlined in the Code of Conduct.
- The school district may collect and examine any device at any time for the purpose of enforcing the terms of this agreement, investigating student discipline issues, or for any other school-related purpose.
- Access to student drives through the district network while using BYOT is not possible. Files may have to be saved on the local drive of the device, a jump drive, an external drive, to the student's Google Apps account or another media device.
- Printing and scanning from personal devices will not be possible at school.
- Personal devices must be in silent mode while on school property.
- Personal technology must be charged prior to bringing it to school and run off its own battery while at school.
- Students remain subject to all other school behavior rules.

I understand and will abide by the above guidelines. I further understand that any violation is unethical and may result in the loss of my network and/or technology privileges as well as other disciplinary action.
