

Using ThingLink with Canvas

- Create a free ThingLink account if you don't already have one.
- Log in to ThingLink.

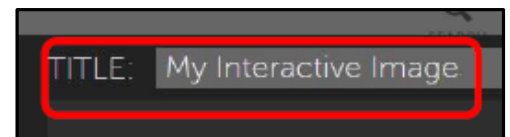

- Click **Create** in the top right hand corner to start a new Thinglink or click **Me** and select the ThingLink you want to work on.

- To upload an image
 - Click inside the upload images box and browse to the file you want to use
 - Or
 - Drag and drop an image into the box.

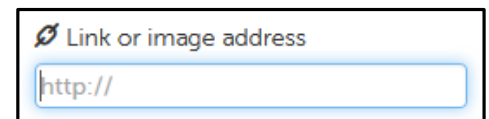

- Give the image a title in the title field at the top of the page.

- On the image, click where you want to add a tag.

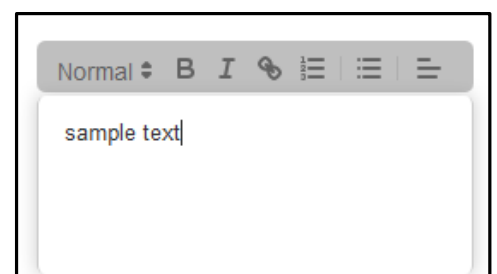

- To link to a website, enter the url in the "Link or image address" field.

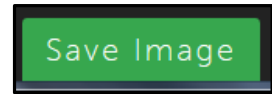

- Click **Save Tag**.

- To add a text tag, enter the text in the text field and click **Save Tag**.

- When all tags have been added, click **Save Image** in the bottom right hand corner.

- To embed your ThingLink into Canvas,
 - Click the Share icon.
 - Click the **Iframe embed** checkbox.
 - Click **Copy Code To Clipboard**.
 - In Canvas, edit the page you want the picture on.

- Click **HTML Editor**.

- Click the mouse where you want to put the ThingLink.
- Click Ctrl + V or right click and choose paste to insert the embed code you copied.
- Click **Save** or **Save & Publish**.
- The interactive ThingLink image should now be on the canvas page.

- When you are finished, log out by clicking the Account button in the top right of the screen then clicking the log out icon.
