

Accessing Georgia Student Growth Reports in the Georgia SLDS Parent Portal

We are pleased to provide you with access to your student's Georgia Student Growth Model (GSGM) Report that provides information on your student's academic progress during the 2017-2018 school year. This report will provide you with Student Growth Percentiles (SGPs). SGPs describe how much academic progress your student made relative to academically-similar students – other students across Georgia with the same achievement history – from one state assessment to the next. This provides you with an apples-to-apples comparison on how much growth your student demonstrated, relative to other students who started in the same place.

There are several resources available to assist you with understanding these new reports. On gsgm.gadoe.org you will find sample Georgia Milestones EOG and EOC student growth reports and a video to assist you with interpreting these reports. There is also an animated introduction to SGP video. Finally, you can view school- and district-level SGP results at gastudentgrowth.gadoe.org.
