

# REAL WORLD

Our teachers understand the importance of having their students' college ready and career bound! Each day our teachers are preparing lessons that are engaging and relevant, cross-curricular, focus on 21st century skills, differentiate learning, incorporate non-fiction reading and writing and provide an authentic assessment of their students understanding. This is our core instructional program in Paulding County. Often times we need community experts to assist us in making the connections between our lessons and experiences students will face in their career choices.

Project REAL WORLD was created to provide unique real-world videos and lessons specifically designed to promote the relevant connections between college and careers to educational concepts. In these videos we highlight various different jobs from many different industries right here in Paulding County depicting how workers are using math, language arts, social studies, and science in their job.

Each lesson provides guides, plans, and materials for teachers to use across our district; as well as students are provided additional resources on where they may find more information regarding the highlighted career. Teachers across our district are able to access the lessons through our district Intranet.

If you would like to get involved to be a showcased business, please contact **Susan Browning** to obtain the interest form.
